As an integrated engineering-procurement-construction (EPC) project delivery firm, O’Neal provides our automotive clients with flexible solutions to deliver complex capital projects.

O’Neal has a long track record working with automotive manufacturers and suppliers. Our automotive industry experience boasts a wide range of applications as an integrated design and construction company.

Over the years, O’Neal has performed more than 2,000 automotive plant design, engineering, and construction projects for major clients, ranging from small, in-plant projects to major grassroots facilities. With a deep understanding of the automobile industry, O’Neal’s people understand how to produce quality results while thriving in the speed and competitive nature of automotive markets. Our team has successfully completed automotive projects in Brazil, Canada, Mexico, and the United States.

- BMW
- Caterpillar
- Draexlmaier
- Freightliner
- Hyundai
- John Deere
- Michelin
- Robert Bosch
- Tesla
- TI Automotive
- Volvo
- ZF
O’Neal Delivers.

INTEGRATED PROJECT DELIVERY
O’Neal focuses on the Business of Project Delivery-integrating overall project planning, design, procurement, and construction to create cost-effective capital solutions. With all of our design, procurement, and construction professionals in-house, our clients benefit from a true collaboration of disciplines. As a full service, integrated engineering-procurement-construction (EPC) project delivery firm, O’Neal offers clients a flexible approach to providing solutions for complex capital projects.

PRECONSTRUCTION
O’Neal leverages design and construction expertise to develop project definition, scope and cost at the earliest phase of a project. Our proven process can identify and quantify clients’ project needs quickly and accurately. This allows clients to develop or confirm funding and schedule duration for their project prior to full capital commitment—guaranteed.

GUARANTEED COST AND SCHEDULE
Unlike most in our industry, O’Neal can guarantee a cost and schedule for project delivery. Our expertise and due diligence in the preconstruction phase allows us to be confident in our cost for total project delivery. O’Neal has a proven track record of aligning our project delivery model with the requirements of Fortune 500 sized companies ensuring clients are getting competitive pricing, a fully engineered project, and safe, quality construction.

EXPERIENCE
Since 1975, O’Neal has been successfully delivering capital projects in diverse industries worldwide. Our professionals average more than 21 years of experience and specialize in complex design and construction.

OUR PEOPLE, OUR VALUES, OUR CULTURE
O’Neal’s people are our biggest asset. As an employee-owned company, O’Neal people have a long-term stake in client satisfaction. Although we are not a small company, working with O’Neal gives you that small business feel. Clients experience a culture that is customer-oriented, accountable and professional.
