— 1,000 square feet*

*15Kv and 5Kv substation buildings  
— 1,550 square feet each*

O'Neal provided preliminary engineering, detailed design, procurement and construction for this grassroots fiberglass manufacturing facility in Western Tennessee.

O'Neal's construction effort included site work, buildings, and procurement and installation of all process equipment, infrastructure, and utilities. O'Neal will also provide start-up assistance and technical support.

The facility will be owned and operated by a third party, using technology provided by PPG Industries.

The project was constructed on a fast-track schedule with a duration of 18 months.
